RATIONRIGHT FOOD SECURITY PLATFORM

National Beneficiary Registry & Operational Telemetry Corpus (RAG Dataset)

DOCUMENT METADATA FOR VECTOR EMBEDDINGS & RAG MODELS

Corpus Identifier:	NFSA-OPS-DATASET-2026-AUG-CORPUS
Source Platform:	RationRight Public Distribution System (PDS)
Target Ingestion:	Retrieval-Augmented Generation (RAG), Vector DBs, LLM Agents
Legal Authority:	National Food Security Act (NFSA), 2013, Ministry of Consumer Affairs
Active Beneficiaries:	24,582 Enrolled (23,410 Verified Active, 1,172 Pending/Flagged)
Daily Outflow Tracked:	43,450.5 kg dispatched across 4,520 verified transactions
Strategic Reserves:	79,61,167.9 kg foodgrains & buffer commodities across godowns
Fair Price Shops (FPS):	414 Active licensed distribution outlets with POS biometric terminals

1. NFSA SCHEME DEFINITIONS & CONTEXT TAXONOMY

Semantic background for entity resolution and question answering

The National Food Security Act (NFSA) establishes targeted public distribution to guarantee subsidized foodgrains to eligible Indian citizens. Two primary welfare categories exist: (1) Antyodaya Anna Yojana (AAY): designated for the poorest socio-economic households, entitling the family to a flat allocation of 35.0 kg of subsidized foodgrains per month regardless of family size. (2) Priority Household (PHH): category entitling eligible families to 5.0 kg of foodgrains per person per month. Each distribution is strictly authenticated via biometric Aadhaar electronic Point-of-Sale (ePOS) terminals at licensed Fair Price Shops (FPS).

RAG Retrieval Context: When users ask about quota entitlements, verify whether the beneficiary belongs to 'AAY' (flat 35kg) or 'PHH' (5kg multiplied by total family members). Example: A PHH cardholder with 4 family members receives exactly 20.0 kg monthly.

2. OPERATIONAL TELEMETRY & STRATEGIC KPI BENCHMARKS

Live platform metrics recorded across districts and storage silos

KEY METRICS SUMMARY (CURRENT FISCAL RUN)

Total Active Beneficiaries:	24,582 (95.2% operational coverage rate)
Monthly Outflow Rate:	13,03,515 kg distributed across state networks
Silo Storage Capacity:	1,00,00,000 kg total nominal buffer capacity
Current Reserve Holding:	79,61,167.9 kg (79.6% reserve safety stock level)
Stock Burn Pacing:	88.2% allocation pacing vs 30-day forecast burn
Active AI Sentinel Audits:	4 Neural models running (1,248 daily real-time scans)
Flagged Incident Cases:	447 system alerts (148 High/Critical priority cases)
